

Primary cap: paired MAE effects across ten frozen seeds

Points are treatment-minus-control means; whiskers are predeclared 95% seed-conditional t intervals. Negative favors treatment.

1 h retrospective lag

Selected vs head

mean -0.004961 | Holm p=0.0117188

Learned vs raw

mean -0.004986 | Holm p=0.0117188

Learned vs randomized

mean -0.000268 | Holm p=0.0117188

Seed-conditional only; not uncertainty over hours, years, or systems.

24 h retrospective lag

Selected vs head

mean -0.002201 | Holm p=0.0117188

Learned vs raw

mean +0.001265 | Holm p=0.0117188

Learned vs randomized

mean -0.000048 | Holm p=0.363281

Seed-conditional only; not uncertainty over hours, years, or systems.
